SUPPLEMENTAL APPEAL BRIEF

Commissioner of Patents and Trademarks
Washington, DC 20231

RECEIVED

OCT 04 2002

Technology Center 2100

Dear Sir:

RECEIVED
BOARD OF PATENT APPEALS
AND INTERFERENCES
OCT 1 - 1 AM 8:20

This supplemental appeal brief is in response to the Notification of Non-Compliance with 37 C.F.R. §1.192(c), alleging that the Summary of the Invention fails to comply with the Rules because "it is only three lines and it does not cite the specification by page and line number". The contents of the original Appeal Brief are incorporated herein, with this Supplemental Brief focussing exclusively on the above-stated allegation.

There is no requirement in the cited Rule about the length of the Summary in an appeal brief. The present Summary accurately summarizes the invention as set forth in Claim 1, without introducing extraneous matter that might cloud the issues on appeal. Accordingly, the substitute brief below now refers to portions of the specification but remains an accurate, succinct, and tightly description of the invention as characterized in Claim 1.

(5) **Summary of Invention**

As set forth in Claim 1 and disclosed on page 3, penultimate paragraph, the invention is a computer (reference numeral 18, page 5, line 18, Figure 1) programmed to query for data (page 5, line 18). For data vectors (reference "p", Figures 3 and 4, page 7, lines 19 and 20) in a data space (Figures 2 and 3, page 7, lines 8-14), respective approximations (Figure 2, block 32, page 7, lines 21 and 22) are generated in polar coordinates (Figure 2, block 32, page 7, lines 21 and 22), and then based on the approximations, "k" nearest neighbors to the query are returned (page 3, lines 13-15; page 4, lines 7 and 8; page 5, line 22 to page 6, line 1).

Respectfully submitted,

John L. Rogitz
